

Talk2M - Certified IIoT Cloud for Remote Solutions

The complete Talk2M security solution ensures that all connected devices and cloud platforms are secure today and in the future.

ISO27001 certified

A highly advanced Information Security management system (ISMS) for the cloud connectivity platform Talk2M

ISECOM STAR certified

Industrial strength security for the cloud connectivity platform Talk2M

ISO27001 is an internationally recognized security standard

The ISMS statement of applicability specifies the roles and responsibilities of HMS in managing all aspects of business continuity and security of the Talk2M service.

The Talk2M ISMS:

- Guarantees that all security issues/threats are identified and adequately handled
- Establishes regulatory compliance and best practice alignment
- Continuously improves the organizational services
- Identifies vulnerabilities and security threats

* The security of Ewon's solution is regularly audited by independent organizations and Ewon / HMS has obtained the ISO 27001 certifications by VINÇOTTE

STAR* ensures a high security level within the Talk2M platform

The Talk2M security environment is regularly tested to ensure the highest security level for the platform, and to ensure that a fully secure solution is provided to the users.

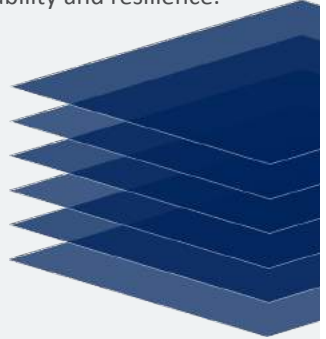

- Auditing and penetration testing are performed on the remote connectivity services within Talk2M, including M2Web, eCatcher, and VPN servers
- Open source testing methodologies such as OSSTMM (Open Source Security Testing Methodology Manual) and OWASP (Open Web Application Security Project) are utilized for full transparency

* Security Test Audit Report

Layered Security approach

Talk2M ensures high security using the “Layered security approach” also called “Defense in Depth Approach”. This approach safeguards information integrity and confidentiality along with information system availability and resilience.

- Policy compliance 
- Network infrastructure 
- User and access management 
- Traffic encryption 
- Firewall 
- Ewon device 

Trusted: all over the world
